

SMART SCM 2015 India

CONCLAVE ON SUPPLY CHAIN MANAGEMENT & APPLIED SMART TECHNOLOGY

04 September 2015: World Trade Center

Hosts

About Us

WTC Bangalore

World Trade Center (WTC) Bangalore, a licensed member of the World Trade Centers Association (WTCA), headquartered in New York, comprising a network of 330 Centers in over 100 countries. WTC Bangalore has been recognized as a key driver of the WTC movement in India by the WTC fraternity and they are setting up WTCs in the other cities of Southern India.

The objective of WTC Bangalore is to foster international trade by providing various services and facilities designed specifically to meet the needs of participants in global commerce. WTC Bangalore is located in an integrated lifestyle enclave encompassing the WTC Tower, Orion shopping Mall, the 5-Star Sheraton Hotel & a multi-specialty Columbia Asia Hospital. The infrastructure available is designed to meet all the requirements of visiting business individuals & delegations within a single location. We receive active participation from the local Business Community, Government, and overseas International Trade Groups.

WTC Bangalore is recognized as an important destination for the exchange of ideas that promotes international trade and opportunities.

WTC Bangalore provides a host of services and facilities for Corporates, International Business Organizations, Small & Medium Enterprises. These include:

- A unique platform to facilitate international trade & investment
- A forum for dialogue, education and training on the ever changing facets of international trade
- A trade information hub where trade data fundamentals on international business can be obtained
- Short-term / transit office facilities, meeting rooms, seminar halls and exhibition space.
- Organize/host trade missions, exhibitions, and targeted business meetings and conferences to attract a steady flow of international business visitors

ISCEA

ISCEA (International Supply Chain Education Alliance) was founded in 2003 by a group of business professionals and academia, with the belief that a more comprehensive education and certification program composed of multiple topics would better serve the global supply chain market. With a healthy dose of entrepreneurial spirit and academic focus, the ISCEA has spread across the globe with offices in North America, Latin America, Asia, North Africa, Middle East and Europe. The ISCEA is the developer of these internationally recognized certification programs.

ISCEA's 100,000+ members hold mid to upper level supply chain management positions in global 2000 companies. The ISCEA's mission is to be the central worldwide source of supply chain knowledge through education, certification and recognition.

About SMART SCM Conclave

In association with WTC Bangalore, SCNext presents the platform for the conglomeration of industry thought leaders and expertise to gain insights into the major fields of supply chain and emerging technologies. With widening scope and relevance of knowledge in these major fields, the requisite to be adept and develop professionalism is obligatory.

The event aims at holding meaningful discussion amongst Industry experts, Academicians and aspiring to-be Leaders of various institutes. The platform emphasizes the exchange of thoughts and ideas with manufacturing industry, ITeS, e-Commerce players, Supply Chain Consulting majors, Supply Chain Service Providers, Material Handling Equipment and Technology Partners, MSME entrepreneurs on contemporary topics in Supply Chain industry and software industry connoisseurs.

What Is SMART ?

SMART is the new age- the age where everyone and everything will be increasingly connected to the internet giving rise to lots of internet savvy, "give it to me now" mentality people. These people will be connected to each other (**S**ocial) and be constantly on the go (**M**obile). There will be a tremendous amount of data generated which will be even more difficult to slice and dice (**A**alytics). We need to **R**e-imagine everything- the rules, the restrictions, the impossible and view it in a new **T**echnology framework

Why SMART and Why Supply Chain together

The world is becoming increasingly connected. By 2020, an estimate 7 billion people are going to be connected to the internet. These people are going to be truly global- developed, developing and also surprisingly under-developed nations will have a burst of people who will be connected, social and mobile. With so many people coming online, the demand for goods and services in a highly responsive fashion is going to stress supply chain management to the max. It is high time when supply chain stops ignoring the outburst, becomes realistic and plans out how the fraternity will cope with this new global challenge. Similarly a connected world with internet of things will drastically alter the economy and outlook of industries totally.

Why to attend?

SMART SCM 2015 India features

- Leading companies discussing what needs to be done to help India ride the SMART Wave
- Thought Leadership on a variety of technology areas and how it seamlessly relates to Operations and supply chain
- Access to a discerning range of audience such as decision makers in business, government entities, consultancies and of course customers transcending cultural and language barriers.
- Displaying prowess to the world about your supply chain products and services through in-conference Expo.
- Interaction with CXO's and top management of esteemed stakeholders on a business networking platform.
